Award ceremony: 12th Alfons de Borja Prize
[13 June 2023 - 18.30h]

>> 2023 winner: Mr.
Sergio Callen [B.S.,
Mechanical Engineering, University of Lleida,
2004] - [Career and achievements](#) [
<https://www.linkedin.com/in/sergio-callen-42405037>
]

Mr Sergio Callen has 17 years of diverse **engineering experience in the United States, Asia, and Europe** participating in several **transportation and infrastructure projects**, procuring and delivering transportation systems using various contracting approaches including public-private partnerships (PPPs) and design-build (DB) in the U.S. and around the globe. Mr. Callen has participated in several alternative delivery projects in North America supporting concessionaires and construction companies to optimize asset performance and design solutions at lower life cycle costs within acceptable risk tolerances for the private entities, through his oversight roles related to the cost, scheduling, estimating, and document management requirements for the Design, Construction and O&M periods.

Mr. Callen is currently Vice-President West Coast at **SYSTRA USA** [<https://www.systra.com/usa/who-we-are/governance/>], where he is responsible for leadership, strategy, growth, business execution, and operations for the rail and Transit industry for the West Region of United States.
